

№14/08-1
dated 14/08/2019

Osaühing LASERTAG.NET notifies that the Game kit «Falcon» comes with the Falcon F1 Standard gun, which is a device that emits focused impulses of safe infrared rays. Falcon F1 Standard uses tSal6100 diodes from Vishay. Technical characteristics of tSal6100 are described in the datasheet provided by the Vishay manufacturer (the datasheet is attached to the notification).

Osaühing LASERTAG.NET also conducted a series of Game kit «Falcon» tests involving the TESTING LABORATORY "TEST CERTIFICATION CENTER PIVDENTEST LLC" to confirm the safety of equipment in accordance with European Union standards.

TEST REPORT No. L032701 / 19, issued by TESTING LABORATORY "TEST CERTIFICATION CENTER" PIVDENTEST "LLC confirms the quality and safety of the Game kit «Falcon» in accordance with the declared standards, as well as the safety of the tSal6100 diodes used, technical specifications of which comply with Class 1 (in accordance with IEC 60825-1 and IEC 62471 standards). The compliance with the declared European Union standards allows LASERTAG.NET to use the EU DECLARATION OF CONFORMITY and mark the Game kit «Falcon» with the CE symbol.
